Terms and Conditions

Designer BioScience Ltd

Terms and Conditions of Sale

1 **Definitions.** In these Terms and Conditions of Sale the “Customer” shall mean the person, institution or company placing the Purchase Order for Goods with the Company. The “Company” shall mean Designer BioScience Ltd. The “Goods” shall mean the material/s which is/are the subject of the Purchase Order. The “Purchase Order” shall mean a request to purchase the Goods, which is written, emailed, faxed or communicated through the Company website to the Company by the Customer.

2 **Quotations.** The Company will provide quotations for the Goods in sterling, unless otherwise requested. Each item on the quotation may form the basis of a separate Purchase Order.

3 **Purchase Order Acceptance.** Once a Purchase Order from the Customer has been received and accepted by the Company the Customer accepts these Terms and Conditions of Sale and the Purchase Order may not be altered or cancelled unless agreed by both the Customer and the Company. Agreement by the Company to cancel a Purchase Order will be withheld if the process of production of the Goods has commenced. Each item of the Purchase Order may be construed as a separate Purchase Order.

4 **Use of Goods.** The Company supplies the Goods solely for research use by the Customer, and the Goods are not to be used for any other purpose.

5 **Price.** The price payable by the Customer for each item of Goods shall be the quoted price for each item of Goods given in the quotation, together with the costs of delivery. Special shipping requirements may be at an additional cost.

6 **Payment Terms.** Payment terms are strictly 30 days from the date of the invoice which shall be dispatched with the Goods to the Customer, and ownership of the Goods shall remain with the Company until full payment for the Goods has been received by the Company. (For a first-time Customer full or partial payment may be required with the Purchase Order unless agreed otherwise by the Company.) If any sum is delayed beyond 30 days the Company shall reserve the right to add interest to the outstanding account at the rate of 2% compounded per month until the account is cleared.

7 **Delivery.** Estimated delivery times are for guidance only and are not guaranteed. The Company will inform the Customer of likely delays if appropriate. The Company cannot guarantee that it is possible to synthesise custom products. Therefore, the Company will not be liable for late delivery or failure to synthesise the Goods or part of the Goods provided that reasonable efforts have been made. The Company reserves the right to fulfil part of the Purchase Order and to invoice the Customer for that part of the Purchase Order delivered. The Company obligation to deliver the Goods ordered shall be suspended so long as the Customer is in arrears with respect to payment obligations.

8 **Specification.** The Goods are supplied at or over the requested quantity and purity, and evidence of quality and purity will be certificated. The quantity shall refer to the gross weight of Goods, and the net peptide content is not calculated. The shelf life of custom peptides will not be provided nor guaranteed, and the peptides will not be tested for toxicity nor for stability.

9 **Non-compliance with specification.** Any Goods that fail to comply with the specification requested must be reported in writing within 14 days of delivery, giving the name of the Goods, the Invoice number and the complaint. After 14 days following delivery of the Goods the Company will presume that the Customer is satisfied with the Goods as delivered. The Company shall not be liable for non-compliance of the specification of the Goods in the Purchase Order due to natural degradation of the Goods or due to improper storage or inadequate handling techniques. Prior authorisation by the Company shall be required in writing before any item/s of the Goods is/are returned by the Customer.

10 **Limitations of Liability.** The Company shall not in any event be liable to the Customer or any third party for any consequential, incidental, indirect, punitive or special damages arising from the acceptance of the Purchase Order or any use of the Goods. The aggregate liability of the Company shall in no event exceed the amount paid or payable by the Customer to the Company for the purchase price of the Goods. The Customer indemnifies the Company against any liability or loss incurred to the extent arising out of the specification of the Goods or out of the Customer's use of the Goods or their derivatives. The Customer indemnifies the Company against any claim or action concerning an infringement of any law or regulation or any infringement of any intellectual property rights or patent wherever held by the use of the Goods for whatever purpose they are used.

11 **Priority of Conditions.** While the Company will use its best endeavours to meet the requests of the Customer these Terms and Conditions of Sale shall have priority in all matters relating to the Purchase Order and its fulfilment or partial fulfilment.

This change is of central importance for peptide recognition by melanoma-specific T-cells, but has no impact on peptide binding to the MHC molecule. It has been shown that the glycosylated form of the asparagines contain peptide is capable of loading onto MHC class I molecules within the endoplasmic reticulum of two melanoma cell lines.</i>	Tyr-Met-Asp-Gly-Thr-Met-Ser- Gln-Val	1mg 5mg 10mg	25.00 75.00 125.00

This peptide shows several biological activities such as simulation of pancreas and gastrontesinal endocrine cell secretion, contraction of extravascular smooth muscle and actions on blood pressure. Bombesin injected intracisternally produces a lowering of basal body temperature in cold –exposed rats. Bombesin and related peptides has been implicated in autoctrine simulation of cell proliferation in human small-cell lung cancer.</i>	Pyr-Gln-Arg-Leu-Gly-Asn-Gln- Trp-Ala-Val-Gly-His-Leu- Met-NH ₂	1mg 5mg 10mg	43.00 129.00 645.00

Cortistatin 14 (mouse, rat) Cat #: 52235 $C_{81}H_{113}N_{19}O_{19}S_2$ M.W.: 1721.05 <i>Cotistatin is a neuropeptide that exhibits strong structural similarity to somatostatin, although it's the product of a different gene. Administration of cortistatin depresses neuronal electrical activity but, unlike somatostatin, induces low-frequency waves in the cerebral cortex and antagonizes the effects of acetylcholine on hippocampal and cortical measures of excitability. This suggests a mechanism for cortical synchronizaton related to sleep.</i>	Pro-Cys-Lys-Asn-Phe-Phe-Trp-Lys-Thr-Phe-Ser-Ser-Cys-Lys (Disulfide bridge Cys2-Cys13)	1mg 5mg 10mg	51.00 153.00 255.00

HIV Integrase Protein Inhibitor(1) Cat #: 52261 $C_{46}H_{55}N_{11}O_7S$ M.W.: 906.1 <i>This hexapeptide which was identified using a combinatorial chemical library inhibits virus-encoded integrase (IN) protein-mediated 3'-processing and integration with an IC50 of 2uM. The peptide is active on IN proteins from other retroviruses such as HIV-2, feline immunodeficiency virus, and Moloney murine leukemia virus, supporting the notion that a conserved region of IN is targeted. The hexapeptide was also tested in the disintegration reaction. This phosphoryl-transfer reaction can be carried out by the catalytic core of IN alone. And this peptide was found to inhibit this reaction, suggesting that the hexapeptide acts at or near the catalytic site of IN. Identification of an IN hexapeptide inhibitor provides proof of concept for the approach, and, moreover, this peptide may be useful for structure-function analysis of IN.</i>	His-Cys-Lys-Phe-Trp-Trp	1mg 2mg 5mg	40.00 68.00 120.00

<i>This activepeptide has been isolated from the skin of a frog of Central and South America: Phyllomedusa sauvagei. Sauvagine belongs to the CRF peptide family. It has been shown that this peptide binds to and activates CRF1 receptors with high affinity and equal potency than CRF. Moreover, although CRF is significantly weaker at the CRF2 receptor, sauvagine retains its high affinity interactions with this receptor subtype.</i>	Gln-Ala-Ala-Asn-Asn-Arg-Leu-Leu-Leu-Asp-Thr-Ile-NH ₂

Custom Peptide Synthesis

Custom peptide synthesis is our core business. Designer BioScience is dedicated to provide high quality peptides at the most competitive prices, with fast turnaround time, to global customers in universities, research institutes, biotech and pharmaceutical companies. Our well trained chemists and state-of-the-art facility allow us to offer a spectrum of custom synthesis services and we produce even difficult peptides with a high success rate. Our secure online quotation/ordering system provides registered customers with instant quotations for their specific peptides and easy access to order management and project status tracking.

Quality Assurance

Designer BioScience is committed to the highest quality. Quality and customer satisfaction are always our top priorities. Before we release any product, we verify carefully that the identity and quality meet the required specifications. At Designer BioScience all peptides undergo rigorous characterization analysis and are delivered to our customers with mass spectrometer and HPLC analysis data. A Certificate of Analysis is included for each peptide with complete detailed information on product information, storage, specification and typical analysis data.

Price of Custom Peptides

Designer BioScience offers the most competitive prices in the industry. Please use our online quote/ordering system to get a quotation within seconds.

Scope of Service

- **Standard peptide synthesis**
 - Simple to complex: sequences from 2 to 120 Amino Acids
 - Small to large scale: from milligram to kilogram
 - Different purity level: crude, desalted, >75%, >80%, >85%, >90%, >95% and >98%

- **Peptide modifications**

- PEGylation
- Phosphorylation
- Biotinylation
- Isotopic labelling
- N-terminus and C-terminus modification
- Cyclic peptides: single and multiple disulfide bridges, amide cyclic (head to tail, side chain)
- Special amino acids (D-amino acids, unnatural amino acids, N-methylated amino acids, etc.)
- Peptidomimetics
- Fluorescence/dye labelling (FITC, 5/6-FAM, MCA, AMC, p-Nitroanilide, Dansyl, TAMRA, etc.)
- Quenched fluorescent peptides (Abz/Tyr(3-NO₂), Abz/DNP, MCA/DNP, MCA/DABCYL, EDANS/DABCYL, etc.)
- Peptide-protein conjugation (KLH, BSA)
- Multiple Antigenic Peptide Systems

- **Peptide arrays**

- Rapid high-throughput parallel peptide synthesis platform providing custom libraries of peptides.

- **Express service**

- Express custom peptide synthesis service within 10 working days delivery is available. Please contact us for more details if you require this service.

- **Process development and contract manufacturing**

- Designer BioScience can offer large scale peptide synthesis and contract manufacturing services. Please contact us for more details.
